

FlexCare

IT Managed Services

Reducing risk to your data and IT assets while freeing up your resources allows you to focus entirely on your core business activities

FlexCare: Flexible Care for Your Business

More and more organizations are outsourcing all or part of their technology environment to managed service providers (MSPs) like us. Network Center, Inc. FlexCare plans are built with your organization in mind, with flexible and proactive services that scale to your organization. No matter what size your organization is we have services to cover you:

- Managed desktop and help desk services
- Managed network and voice services
- Managed Security services
- Complete outsourcing of IT

What's Included with FlexCare Managed Services?

A FlexCare managed services plan covers all aspects of your IT service needs, no matter the size of your company or current IT team. Agreements have a menu driven structure so you can pick the pieces that suit your business. A typical managed services agreement may include:

- Proactive monitoring
- Help desk support
- Proactive maintenance
- Email alerts
- Access to security tools
- Detailed reporting
- Strategic consulting meetings
- 24/7/365 Emergency support

Whether you are a small or mid-sized business needing to outsource your entire infrastructure or an enterprise organization looking to partner on a specific function, we have options to support your IT vision.
