

# NCI Managed Services

Reducing risk to your data and IT assets while freeing up your resources allows you to focus entirely on your core business activities.

## Why outsource your technology?

More and more organizations are outsourcing all or part of their technology environment to managed service providers (MSPs) like us. Network Center, Inc. (NCI) understands that every business has different needs and no matter what size your organization is, we have services to cover you:

- Managed desktop and help desk services
- Managed network and voice services
- Managed security services
- Complete outsourcing of IT

## What's included with NCI Managed Services?

A managed services plan covers all aspects of your IT service needs, no matter the size of your company or current IT team. A typical managed services agreement includes:

- Proactive monitoring
- 24/7 help desk support
- License management
- Proactive maintenance
- Email alerts
- Access to security tools
- Detailed reporting
- Strategic consulting meetings

Whether you are a small or mid-sized business needing to outsource your entire infrastructure or an enterprise organization looking to partner on a specific project, we have options for your IT vision.
