

OneProtect: IT Security Package

When you can't seem to stay on top of the latest security tools, let us protect you with one all-encompassing package. After all, you are only as good as your weakest link.

What is OneProtect?

OneProtect provides the most up-to-date solutions to prevent your business from being exposed to a never ending list of threats. To ensure that you are using the most current version of security tools available, our OneProtect package offers a fully managed bundle of solutions.

- Fully managed service to monitor your network and allow you to mitigate security issues on a continual basis
- Cloud-based email filtering that protects users from anywhere and any connections
- Prevents hackers, malware threats and data theft without slowing down your system

How is OneProtect used?

Knowing what types of security you need for your users can be a daunting task. OneProtect provides an easy to manage bundle of the most current security software available on the market today. Staying current to prevent threats is vital to your IT security.

- Scans your network at regular intervals for threats
- Gives you the information to help remediate vulnerabilities before they can be exploited
- Assists in making yearly audit findings minimal
