

Proactive technology
that powers your business.

VULNERABILITY SCANNING

WHY SCAN?

Vulnerability scanning takes stress off your plate.

By scanning your network routinely, you can address problems immediately.

Gives you the information to remediate vulnerabilities **before** they can be exploited

Assists in making routine audit findings minimal by scanning frequently

HOW DOES IT WORK?

Scans - at regular intervals - any device connected to your network

Uncovers weaknesses in your environment

Shows which devices have vulnerabilities

Provides solution for remediation

Performs final scan to ensure remediation was successful

WHY WORK WITH US?

NCI will customize vulnerability scanning for your business.

You set the interval of how often scanning is performed.

After weaknesses are found, **you decide** whether to take action yourself, or to let us at NCI remediate for you.

We'll perform a final scan to ensure remediation was **successful** - regardless of who completed the remediation.

We'd love to customize a solution that's the best fit for you. Contact us today for a consultation.
